Questions focused on Teaching Assistant

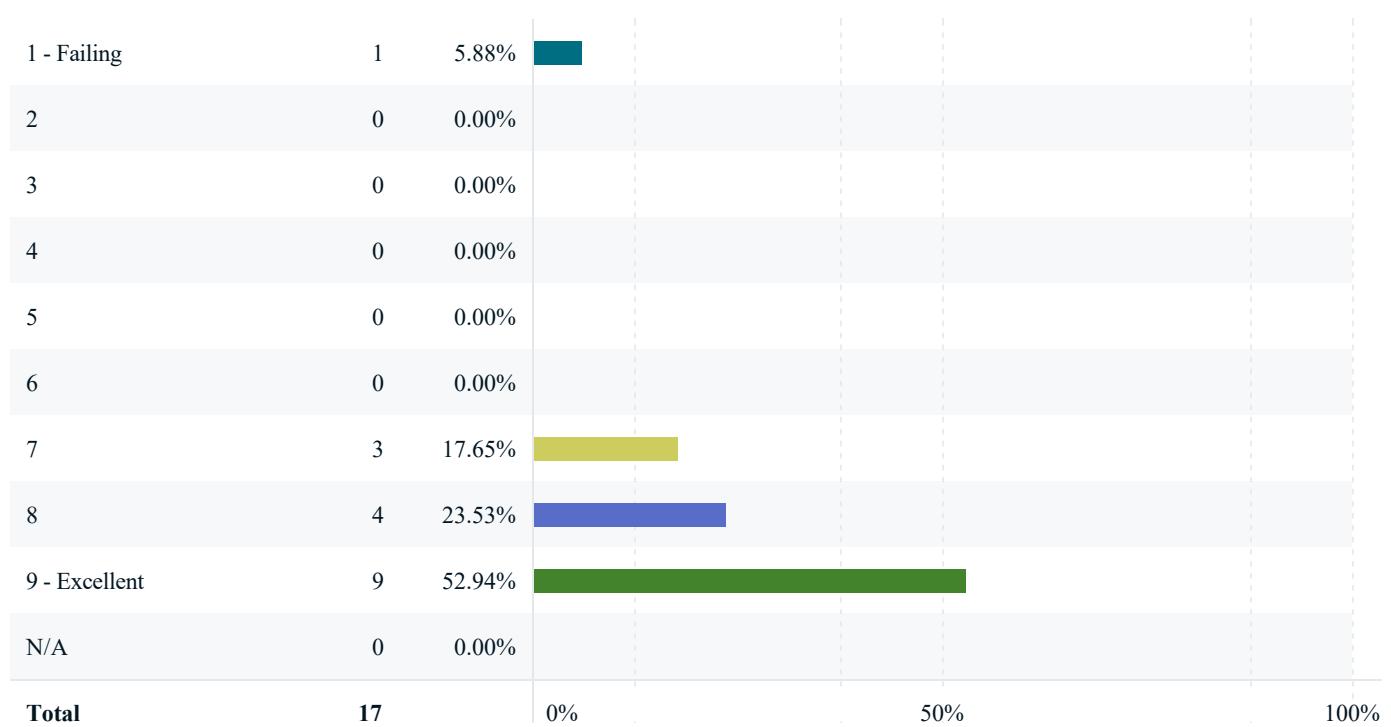

UCLA Department of Mathematics

1. How would you rate your TA as an effective teacher?

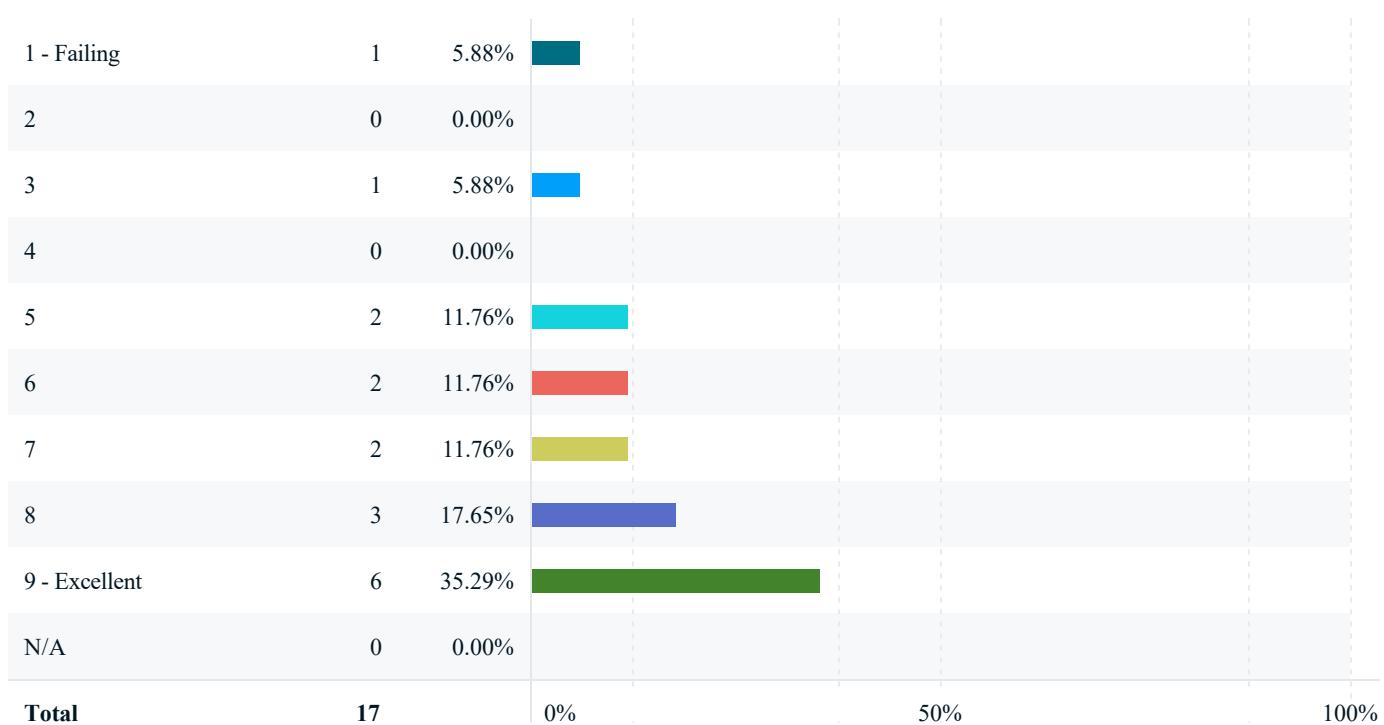

Statistics	Value
Response Count	17
Response Ratio	60.71%
Mean	7.88
Median	9.00
Mode	9
Standard Deviation	1.65

2. How would you rate the availability and helpfulness of your TA outside of the classroom?

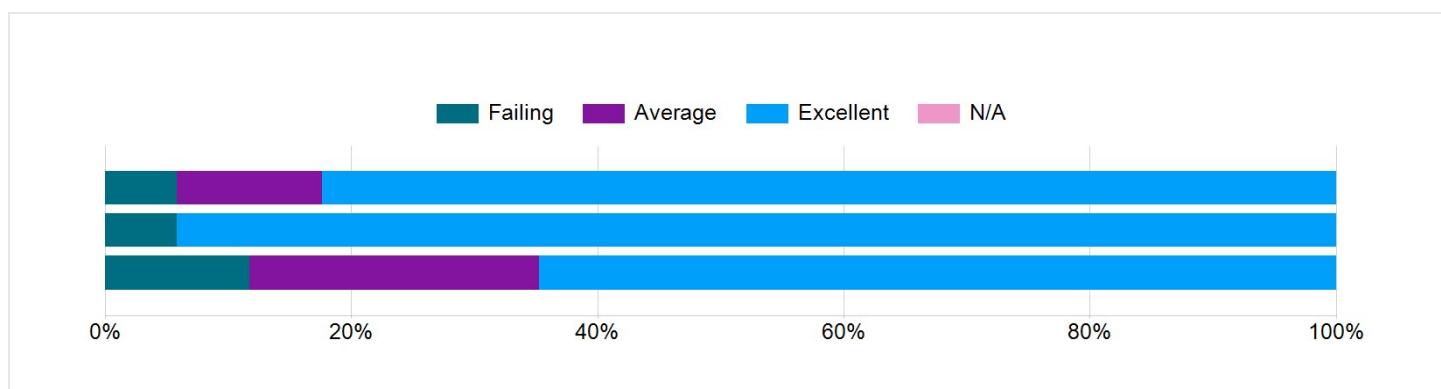

Statistics	Value
Response Count	17
Response Ratio	60.71%
Mean	7.94
Median	9.00
Mode	9
Standard Deviation	1.95

3. What is your rating of this course independent of the effectiveness of the TA?

Statistics	Value
Response Count	17
Response Ratio	60.71%
Mean	6.94
Median	8.00
Mode	9
Standard Deviation	2.36

Comments
He was a very good TA, and was great during office hours!
Chill guy, helped a bit with the terrible lectures from the prof
John was a very great TA! His office hours were unbelievably helpful and discussions were straight to the point and clear!
TA Woo is really good at explaining concepts. He does a great job of going over the topics learned the previous week, while allowing us to apply the concepts in examples. The quizzes are mostly comparable to the weekly assigned homework. Sometimes the questions were a bit more difficult because it is based of all the sub-chapters we learned, so of two questions on the quiz it could be from any part of the lessons. The textbook is mostly helpful, sometimes there are further explanations we do not go over in lecture so I am unsure if we are tested on those examples/concepts.
John, you are a life saver. This class wouldn't be the same without you. Thanks for all the help and clarity with concepts.

Overall the quizzes that were given during section were related to the concepts that were being presented in class. However, when it came to the explanations to the concepts it was somewhat confusing and unclear to follow along to.
Jonathan is an absolutely phenomenal teacher. The way he is able to easily synthesize the material into a digestible fashion for one session for 40 minutes. He is so approachable and well-articulated in his explanations.
Grading was not clear and I still don't know what my grade is. Professor said not to trust Bruinlearn but there are things on bruinlearn which are not on gradescope and I am insure of how to know my overall percentage is in this class.
TA is very helpful and supportive. I really appreciated his thorough answers to my questions.
My TA was a great resource for help during the course, and explained the content very well.
The TA is very helpful both in helping with homework and in explaining concepts students didn't understand during lectures.
The TA was good.
everything is good
Jon is probably the best TA i've ever had in math (he's also the first so he definitely set the standard). He saved my life in calculus, I think if it weren't for him I'd be on the brink of a D. He explains the questions so well and he's so helpful and always making sure we understand but also giving us space to do the problems on our own or at least try. If you had any problems in calculus whether it was the homework, quiz, midterm, or generally if you had any inquiries, he's the person to go to. He's very understanding, cooperative, and always willing to go the extra mile like talking to the professor for you. I learnt more in a single discussion with Jon than I did in any and all of the math lectures I've attended this quarter. That literally also reflects in our grades. I mean all my quizzes are a 10/10 but my midterm (that I'm still recovering from) was a 59/90...a 59!! I've taken AP calc in high school and I've never in my life gotten anything below an A. I'm so grateful that he was my TA and I hope he lives a very long and happy life.
